

## Description

We are on the hunt for a goal driven and self-motivated **Journeyman Electrician** south of Nashville. This person has exceptional skill in troubleshooting, repairing and maintaining all the components of various industrial systems. The position is full time working within a major manufacturing plant between Franklin and Columbia, TN. This requires flexibility to work various shifts.

- This will require 7 day coverage
- This position will start with second shift coverage

**Nashville Machine** is one of Tennessee's most widely respected companies, offering mechanical contracting, machine shop services, elevator services, and building systems service. We have been part of the Nashville community for the last 110 years and are constantly evolving with the times. Read about our history in the Nashville Business Journal here: [Nashville Machine weathers ups and downs](#). Our success is a reflection of the team we employ. We encourage our team to be the best that our industry and community has to offer. This is achieved through providing our staff with the tools, training, and mentoring that they need to be successful. We are a team, not just a company. We believe that in order to create an environment of teamwork that accountability must be at the forefront of our plan.
